

## perma LUBRICATION SYSTEMS FOR OPEN GEARS

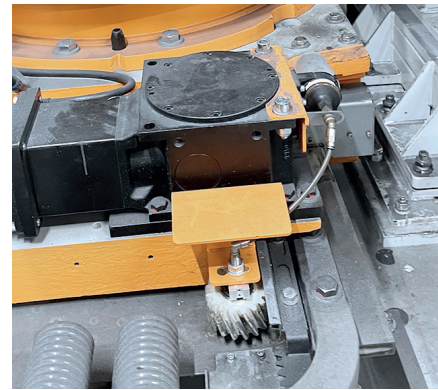

### CHALLENGE

- Hard-to-reach lubrication point
- Contamination of lubricant
- Efficient lubricant application
- High workplace safety risk
- High machine priority
- Prevention of unexpected downtime

### SOLUTION

## ADVANTAGES

- Continuous lubricant supply
- Status check of lubrication systems via display and LED from a safe distance
- Increased workplace safety through less maintenance work
- Reduced maintenance costs due to scheduled maintenance tasks
- Enhanced equipment availability and efficiency
- 80 % cost savings through efficient lubricant usage

\*For additional information see value case study – „SAC WWTP Effluent Motors“
